

eCode ezToken

Introduction

Todos eCode™ ezToken is a compact device that can generate One Time Passwords (OTPs). With a single press on the button a OTP is easily generated.

Todos online eCode demo bank is located at: www.ecode.se
There you can try your Todos eCode™ ezToken.

Note!

Do not generate One Time Passwords if you do not intend to use them for login since you may get out of sync and then locked out. The bank/service provider decides how many attempts you get. In the demo version you have 3 attempts before you get out of sync and have to resync. If you generate another 30 OTPs without using them you will be permanently locked out.

Press button to
generate OTP

How to use Todos eCode ezToken

Press the button on the side to generate a One Time Password. The OTP will be shown in the display.

After some time the OTP will flash for a few seconds and then disappear. Press again to generate another OTP.

You use this OTP to login to your Internet Bank account or use it for Telephone banking. It is advised to use a static password in combination with this OTP for higher security.
